

1.5 How to Use this Manual

On the opposite page, please find a sample BMP Fact Sheet. This sample helps illustrate and explain the components that make up a fact sheet. Please note that some of the metrics used for the EPP and SMP section were not applicable to other sections and as such are not included.

On the pages following the example please find a summary of the BMPs described in this manual. The summary tables should make it easy for the reader to quickly reference information such as symbols, cost and pollutants targeted by these BMPs.
